COACHCOMM  
**X SYSTEM**<sup>®</sup>

# Communication for teams that demand the best.

X-System is the premier game day communications system that meets the ultra-complex needs of today's college football teams. Featuring the latest in innovative headset technologies, X-System enables coaches and staffs to effectively and clearly communicate on the sideline, across the field, and in the press box – even in the most challenging game day environments. With the latest offering, X-System continues to provide the communication you need now and in the future.

## Introducing the NEW XRP-22 and XRP-44 Radio Packs

It's now possible to have more ways to communicate to more people by adding other staff to an X-System without the need for additional system infrastructure or "islands" of communications like two-way radios. With the addition of the XRP-22 and XRP-44 radio packs, users such as medical trainers, techs, and equipment managers can talk and listen on more than one channel/conference at the same time.

A fourth radio transceiver can also be added to increase the total number of users available on the X-System by six. When using high density mode, the additional capacity increases up to 32 users!

The additional user capacity easily expands your X-System so that technical staff and other users can monitor and sometimes communicate with coaches and staff on multiple channels/conferences.

### PRODUCT HIGHLIGHTS

- Multiple simultaneous talk and listen conferences on one radio pack
- Easily added to an existing X-System
- Compact size and lightweight (13 oz./ 369 g)
- 7 kHz digital audio for excellent voice quality
- Familiar volume/talk user interface
- Large informative and easy-to-read display
- Two assignable function buttons
- Access to up to 64 conferences
- USB connection for pairing, firmware updates, and battery charging
- Dual battery operation (Li-Poly or AA)
- Greater than 10 hours continuous operation (Li-Poly)
- Easy-to-use spring-loaded belt clip

Critical communications demand the latest technology in data delivery. X-System now leverages optical fiber technology for high-speed, secure communications. X-System takes advantage of fiber to connect the sideline X-System to the wireless press box to provide redundancy, sync, and future features and expansion between the sideline and press box.

### WHY FIBER?

- Control - ability to monitor and control the full system from either the X-Cart on the field or trunk in the press box
- Sound Quality - no static and no need to auto-null
- Secure - no ability to "tap-in"
- Reliable - not susceptible to water, weather, and environmental issues
- Distance - greater range and can be run up to 10km (6.2 miles)
- Efficient - single connection carries multiple audio channels/conferences.
- Freedom - no cables, easy setup
- Fully Integrated with the X-System Digital Wireless Press Box

## Fiber Cleaning, Connection, and Testing Kit

The maintenance and care of fiber is essential for optimal performance. The X-System Fiber Cleaning, Connection, and Testing Kit helps ensure that your fiber is ready for game day. The kit includes cleaning sticks for various types of fiber, four different cables/connectors to ensure that the X-System can connect to any fiber inside of a stadium, as well as a pen laser to test and determine the functionality of the fiber to provide you with that extra peace of mind during setup and prep for your game.

## X-Ware: Game Day Interface

### HIGHLIGHTS

- Newly designed icons to support new 2 and 4 conference radio packs, coach-to-player workflow, and official's muting capabilities.
- Audio Recording functionality to allow for recording up to two individual conferences.
- Wired Audio Mute feature for worry-free operation when switching between practice and game day.

# Digital Wireless Press Box

## X-SYSTEM DIGITAL WIRELESS PRESS BOX

- Digital signal transport across stadium fiber
  - Superior sound quality
  - Secure communications
  - Redundant analog (dry-pair back-up)
- Remote access to X-Ware
  - Faster solutions to in-game needs
  - Digital dashboard for complete system at one glance
- Wireless in the Press Box
  - Point to point conferencing between coaches
  - Same Radio Pack interface offering access to up to 3 conferences
  - Less clutter around coaches
  - Faster setup and teardown

## X-SYSTEM SIDELINE CART

- Highly engineered solution
- Large 19" high-resolution touch screen
- Quickly deploy multiple antennas with included mast and mount
- Storage for all major system components
- X-Drive electric motor for enhanced mobility and braking

## COACH-TO-PLAYER COMMUNICATIONS

Whether it's changing the play at the line, assisting in adjusting players on the field, or continuing to coach your players right up to the snap of the ball, coach-to-player\* technology provides an added benefit to every team. CoachComm has taken communication to the next level yet again with an innovative approach to coach-to-player communication.

The new CoachComm X-System Player communication enables one or more coaches to communicate directly to on-the-field players through the use of wireless receivers worn by players. X-System Player Communications is fully integrated into the current full line of X-System products and features exceptional audio, a familiar X-System interface, and complete field coverage. While not yet approved for in-game use, CoachComm is ready with the solutions you need for the next phase of coaches' communication tools for game day and practice.

## C2P Highlights

- Proven solution
- Small, Lightweight, Rugged
- Simple Interface
- Long Battery Life
- Seamless X-System Integration and Control
- Full-field coverage and range
- Least complex and least expensive path to manage frequencies
- Supported by New High Density Mode for Increased Number of Players
- Uses Modern Technology:
  - Leverages X-System's proven, state-of-the-art RF
  - Excellent audio quality – easier to hear in game environment
  - Provides features for both game and practice
  - Includes a mechanism for Officials interrupt function for muting
- Compatibility with vast majority of current coaches' communication
- Cost-effective, efficient solution

\* Not approved for in-helmet use

## System Highlights

- Easy to setup. easy to use
- Unlimited users
- Portable
- Cost-effective
- Coach-to-player communications using Cobalt PLUS Player Receivers

### PRACTICE HEADSETS

The Cobalt PLUS coaching headset system featuring the SmartBoom® PRO headset is an excellent option for coach and player communication at practice. The system features 6-channels and unlimited users so you get a practice headset solution that is cost-effective, yet powerful.

## System Highlights

- Motivates players with scheduled music automatically during practice
- Improves practice efficiencies through coordination and structure
- Increases the pace of the game
- Conditions players to high-noise environments with powerful sound

Tempo is an innovative practice management system designed to provide total control over practice through time management, motivation, and coordination tools. It's also a powerful tool for teams seeking a competitive edge. Prepare your team and get the winning advantage with Tempo.

# X-SYSTEM HEADSETS AND ACCESSORIES

## SmartBoom® PRO

Features superior comfort, durability, and noise reduction in loud stadiums.

The SBP is the headset of choice by coaches around the country because it delivers in the toughest environments. Even in loud and intense games, SBP gives coaches the freedom to quickly mute communication with a lift of the mic. High quality audio and soft padding for superior comfort make SBP a must for coaches that demand the best.
